Pereira, Colombia · Remote

CORE STACK

Java · Spring Boot · Quarkus
Node.js · NestJS · Next.js
Angular · React · Vue

SKILLS

LANGUAGES
Java, TypeScript / Node.js, JavaScript, Kotlin, Go

BACKEND
Spring Boot, WebFlux, Quarkus, Apache Camel, Vert.x, Node.js, NestJS

FRONTEND
Angular, React, Vue, Next.js, TypeScript

DATA & STREAMING
Kafka (Confluent), Debezium, GCP Pub/Sub, PostgreSQL, Oracle, MongoDB, Redis, DynamoDB

CLOUD & DEVOPS
AWS, GCP, Azure, OpenShift, Kubernetes, Docker, Terraform, GitHub Actions, Keycloak, Kong

OBSERVABILITY
OpenTelemetry, Prometheus, Grafana, Loki, Tempo

QUALITY & TESTING
JUnit, Testcontainers, Cypress, K6, Gatling, Chaos Engineering, SonarQube

ARCHITECTURE
Microservices, Event-Driven, CQRS, Hexagonal, DDD, Serverless, ADRs

ANDRES FELIPE ZAPATA

SENIOR SOFTWARE ENGINEER · FULL STACK JAVA & NODE.JS

Full stack software engineer with **10+ years** of experience building platforms that serve **700,000+ users** across Colombia and Latin America. Core stack: **Java** (Spring Boot, Quarkus) and **Node.js / TypeScript** (NestJS) on the backend; **Angular**, **React** and **Vue** on the frontend; **Next.js** for full stack applications; deployed on **AWS** and **Kubernetes**. Designs microservice, integration and **Kafka event-streaming** architectures, and leads engineering teams in **payments, transportation, logistics and banking**.

KEY ACHIEVEMENTS

- Member of the team that built **IP/REV** (Electronic Vehicle Toll Collection Interoperability) for Colombia's **Ministry of Transport**, on an **event-driven**, **highly concurrent**, high-throughput transaction architecture.
- **Integrated shippers and carriers** such as **Grupo Nutresa** and **Rápido Ochoa** with the **RNDC** (National Cargo Dispatch Registry): consignment notes, electronic cargo manifests and proof-of-delivery records.
- **Cut latency by 98%** (5 s → 100 ms at 10,000 req/s) in mission-critical microservices at **Banco de la República** (Colombia's central bank) using WebFlux, Redis and MongoDB.
- **Reduced time-to-market by 40%** with a Developer Experience platform (Backstage, AWS Service Catalog, service archetypes) presented to the C-suite.

EXPERIENCE

Technical Lead
Mar 2024 – Present

Quind · *Remote · Client: Flypass, electronic toll & parking payments · FinTech / Transportation*

- Design **microservice and data-streaming** architecture for the payments and mobility platform (Spring Boot, Kafka, CQRS, AWS).
- Lead the **e-invoicing**, **customer service centers** and **memberships** workstreams: solution design, ADRs, code reviews and quality gates (JaCoCo, SonarQube).
- Drive the migration of legacy components to **Quarkus + GraalVM, Java 21 and Virtual Threads**.
- Led a **Developer Experience** initiative (Backstage, AWS Service Catalog, archetypes) that cut **time-to-market by 40%**.

Senior Red Hat Integration Engineer
Jun 2026 – Present

Avianca · *Remote · Contractor via Assist · Airline / Payments*

- Integrate Avianca's **payments core** with Latin American payment gateways and methods such as **DEUNA** and **Wompi**.
- Design the integration architecture on the **Red Hat** stack, using **Quarkus** and **Apache Camel** to connect the core with each payment provider.

Full Stack Developer & Tech Lead
Dec 2025 – Jun 2026

Fiscalía General de la Nación · *Remote · Contractor · Public sector (Colombian Attorney General's Office)*

- Designed and built three core systems: **Extradition & Capture**, **Victim & Witness Protection** and **Private Prosecution**.
- **Full stack** development with **Node.js / TypeScript (NestJS)**, **React** and Oracle PL/SQL; deployed to **OpenShift** through GitHub Actions pipelines.

Senior Integration Developer
Oct 2025 – Jan 2026

CELSIA · *Remote · Contractor · Energy utility*

- Led the migration of the integration bus from **IBM App Connect to on-premise Kubernetes** using Quarkus, Apache Camel and Kafka.
- Designed and documented the migration strategy for mission-critical **power distribution metering** systems.
- Implemented end-to-end observability with **Grafana, Loki and Tempo**.

EDUCATION

Technologist Degree in Information Systems Management
Fundación Universitaria Comfamiliar Risaralda · 2018 – 2021

LANGUAGES

Spanish (native) · English (B2, upper intermediate)

TRANSPORTATION DOMAIN

RNDC, electronic cargo manifests, consignment notes, proof of delivery, SICE-TAC, IP/REV, RUNT, electronic tolling (TAG), e-invoicing

APPLIED AI

AI-assisted development with coding agents (Claude Code), with a strong focus on security and confidentiality.

PRE-SALES

Requirements discovery with clients, solution design and architecture decision records (ADRs).

Software Architect & Developer — Jul 2020 – Present

Independent Contractor · *Remote · Freelance · Freight transportation, logistics, banking*

- **RNDC integration** (Colombian Ministry of Transport) for shippers and carriers such as **Grupo Nutresa** and **Rápido Ochoa**: consignment notes, **electronic cargo manifests** and **proof-of-delivery records**, with upfront data validation and full traceability of every submission.
- **Event-driven** architecture for the freight dispatch lifecycle (order → consignment note → manifest → proof of delivery) and freight payment reconciliation.
- Modernized legacy Oracle/Java systems with the **Strangler Fig** pattern and **CDC** (Debezium + Confluent); migrated LDAP to **Keycloak / OAuth2**.
- Tuned **Kafka** clusters (partitioning, replication, compression) and set up disaster recovery with **MirrorMaker 2**; observability with OpenTelemetry, Prometheus and Grafana.

Senior Software Developer — Jul 2023 – Mar 2024

OLJ Solutions · *Hybrid, Medellín · Projects: IP/REV and RUNT · Transportation*

- Full stack development of **RUNT** (National Transit Registry) services with **Java**, **Node.js**, **Spring WebFlux**, Quarkus, Kafka, Angular and React on **AWS** (Lambda, Docker).
- Built **IP/REV** for the Ministry of Transport: interoperability between toll operators and TAG providers for nationwide electronic toll collection.
- Designed **reactive, event-driven** architecture for distributed microservices; applied TDD and code reviews.

Technical Lead · Software Engineer — Feb 2021 – Jul 2023

INDRA Colombia · *Remote · Client: Banco de la República (central bank) · Banking*

- Led **two teams of four developers** building Java 8–17 microservices (Spring Cloud, GCP Pub/Sub, Apigee, AWS, DynamoDB).
- **Cut latency by 98%** (5 s → 100 ms at 10,000 req/s) in mission-critical microservices using WebFlux, Redis and MongoDB.
- Resolved transactional integrity issues by enforcing ACID guarantees, improving data consistency by **90%**; launched a Coding Dojo (Jenkins, SonarQube, Kafka).

EARLY CAREER

Software Developer, Emtelco (Tigo-Une) — 2020 – 2021
ETL/ELT pipelines for telecom Big Data (Java, C#, PL/SQL).

IT Technician, Estatal de Seguridad — 2019 – 2020
Database optimization and application support.

Freelance Developer, iKono Telecomunicaciones — 2018 – 2019
Odoo ERP/POS implementation (invoicing and inventory).

IT Support Technician, Atento — 2017
ITIL-based service desk for B2B clients.
